

## TRINITY'S GRADUATING SENIORS, 2020

### Brady Caron

I am going to miss my Trinity family who have been with me all 17 years of my life. I've made countless memories serving and spending time with the people here. From serving at Loaves and Fishes to going on the mission trip to White Earth, I couldn't be more grateful for my time helping others with the Trinity community. I plan on attending Cal Poly SLO in the fall, even though they will most likely be having online classes. Thanks to everyone who made my time at Trinity special, I'll miss you.

### Jake Caron

Next year I am planning on attending Cal Poly to study mechanical engineering. I grew up at Trinity and it has shaped the person I am today. The Trinity community has been a part of my life since I can remember. I have many fond memories of Sunday morning youth group and the Maundy Thursday lock in. I am excited to start a new chapter in my life and venture out on my own, but my home at Trinity and in Minnesota will always be with me.

### McKenna Eggers

### Dominic Frerichs

"Trinity is a good place to help me clear and calm my mind during stressful times, especially during the school year."

Dominic will be attending Middlebury College, in Vermont, this fall, and will be on their Men's Swim and Dive Team.

## Joel Grabner

Trinity is a great community. It is a very loving and close community. It is like a second family to me. A memorable moment is when I was young I liked to be in the "pillow room" and jump on the couches. It was, at that time, the Senior High room and now where Chip's office is located. Anne Miner-Pearson was great to work with on the origami project.

## Isaac Reesor

I grew up going to Trinity with my family on Sundays. We also celebrated and made many happy memories. As I got older, Trinity became a place for me to express my faith and grow spiritually. Trinity will always be a part of my home. I plan to attend the University of Wisconsin-Madison where I will study Engineering.

## Sean Sticha

I am appreciative of the faith I have learned and developed while at Trinity. The friendships I have made and our church clergy who make Trinity a family.

Sean will be attending the University of St. Thomas and studying Mechanical Engineering.
